

This isn't just a collection of young or promising writers; it's highly accomplished and enjoyable writing. From grandmothers to snow, a girl who lives in a jam jar to a skate park at twilight, the poems are varied in their subject matter and united in their excellence. Moving, imaginative, exciting, this writing makes clear that the future of poetry is in very safe hands.

Jonathan Edwards

A wonderful anthology – imaginative, sensitive, surprising, lively and positively bursting with fresh new voices. I couldn't put this book down, to read it is to be captivated by astounding talent in the making. These are writers I know we'll be seeing books by in the future. It's a joy to read them.
